We are just here updating the NSA email system. Nothing big.

Also we would like you to look at alamo@nsa.gov & bill.gates@nsa.gov

Is that Adrian Lamo & Bill Gates? Know hacker/informant/snitch & Microsoft ex-owner & founder?

Up to you to decided.

We are sure you can find even more.

#TROLLtheNSA

NSA.

So, you want to troll the NSA do you? Ok, here are some suggestions... every email you send, make sure you send the entire group of key words along with it under the messaged you just typed with a brief description of why you are doing so.

Example:

The list of words below are key words that the NSA targets for monitoring on their #Prism system. I am protesting the monitoring and illegal activities that are directly bypassing the 4th Amendment to the Constitution of the United States.

Or, you could just email your friends and family crazy emails scripted with the words enclosed. Besides email; you can use these words on social media such as twitter or FedBook.

*** Good luck, and happy trolling. ***

And the full list for your browsing pleasure:

For IP if you like:

I find it difficult to believe the argument below that call metadata is not covered under the 4th Amendment when Federallaw (18 USC Section 3121) explicity requires a warrant for pen register and trap-and-trace.

> http://codes.lp.findlaw.com/uscode/18/II/206/3121

> a) In General. - Except as provided in this section, no person

>
> (50 U.S.C. 1801 et seq.).

(b) Exception. - The prohibition of subsection (a) does not apply with respect to the use of a pen register or a trap and trace device by a provider of electronic or wire communication service -

(1) relating to the operation, maintenance, and testing of a wire or electronic communication service or to the protection of the rights or property of such provider, or to the protection of users of that service from abuse of service or unlawful use of service; or

(2) to record the fact that a wire or electronic communication was initiated or completed in order to protect such provider, another provider furnishing service toward the completion of the wire communication, or a user of that service, from fraudulent, unlawful or abusive use of service; or (3) where the consent of the user of that service has been obtained.

Clearly, collecting the the source and/or destination phone numbers for a call require a court order.

Perhaps one could argue that 3121 only applies to that specific metadata and any other is fair game (not the argument made before Congress below).

But I suspect some courts would say that the will of Congress was to prevent government collection of metadata without a warrant, and that the only metadata available at the time the law was written was phone numbers.

Another argument might be that the law specifically applies to installing a pen register or trap-and-trace *device.* That argument would effectively gut 3121, as nobody uses physical collection devices any more.

However, some years back when I had some limitedi involvement with law enforcement, when performing surveillance they applied 3121 to modern means means of collecting the information, eg. requesting it from the provider. So I think the "device" argument would hold little water.

Deputy attorney general James Cole defended the bulk collection of Americans' phone records as outside the scope of the fourth amendment's protections against unreasonable searches and seizures.

> "Toll records, phone records like this, that don't include any content, are not covered by the fourth amendment because people don't have a reasonable expectation of privacy in who they called and when they called," Cole testified to the House intelligence committee on June 18. "That's something you show to the phone company. That's something you show to many, many people within the phone company on a regular basis."

#TROLLtheNSA

Fuck you NSA.

So, you want to troll the NSA do you? Ok, here are some suggestions... every email you send, make sure you send the entire group of key words along with it under the messaged you just typed with a brief description of why you are doing so.

Example:

The list of words below are key words that the NSA targets for monitoring on their #Prism system. I am protesting the monitoring and illegal activities that are directly bypassing the 4th Amendment to the Constitution of the United States.

Or, you could just email your friends and family crazy emails scripted with the words enclosed. Besides email; you can use these words on social media such as twitter or FedBook.

*** Good luck, and happy trolling. ***

NSA.GOV - National Security Agency (NSA) - DNSi Leaked

The National Security Agency (NSA) is a cryptologic intelligence agency of the United States Department of Defense responsible for the collection and analysis of foreign communications and foreign signals intelligence, as well as protecting U.S. government communications and information systems,[1] which involves information security and cryptanalysis/cryptography.

The NSA is directed by at least a lieutenant general or vice admiral. NSA is a key component of the U.S. Intelligence Community, which is headed by the Director of National Intelligence. The Central Security Service is a co-located agency created to coordinate intelligence activities and co-operation between NSA and other U.S. military cryptanalysis agencies. The Director of the National Security Agency serves as the Commander of the United States Cyber Command and Chief of the Central Security Service.

Here is a internal NSA email, these are names of people tagged by Prism. My guess is they are terror suspects. I got this off a short lived 4chan link. unfortunately the emails have been taken off in the email and attached doc. Would have been fun to spam some pigs.
